RUGGEDIZED RDP SHIPPING CASE Part No. MB-6886-22

The *MB-6886-22* is designed to protect the Micom RDP-2 and RDP-3 from the harshest environments during shipping.

The goal of this product was to provide a case that is easily moved, met airline luggage regulations, and provided protection for the RDP systems through many years of hard service. The case accommodates both the RDP suitcase and the accessory bag, each in its own area.

Utilizing the latest injection molding techniques, HPX resin plastic is used for construction of the case. With the addition of recessed wheels, retractable handle, and fold down handles on all four sides, moving the case is extremely easy. The case also features an O-ring seal and automatic pressure equalization valve and hinged push-button latches.

With a 4 year warranty against defects in material or workmanship, and breakage, the *MB-6886-22* is the perfect answer to protecting your RDP when shipping and keeping the accessories from getting lost.
